(54) Title: FRAME OR MESH MOUNTED SYSTEM FOR ATTACHING A TRIM SET TO A MESH MATERIAL SURFACE

(57) Abstract: A trim set attachment assembly is provided comprising a retaining strip attached to a mesh panel encapsulated within a seat frame, and at least one tab extending from the trim set and securely seating between the retaining strip and the mesh panel, thereby securing the trim set in relation to the mesh panel. The tab includes a trim piece seated within an anchor. The trim piece extends from the trim set to seat beneath the retaining strip atop the mesh panel, while the anchor prevents the trim piece from sliding out from under the retaining strip. The retaining strip includes a base, with at least one retainer extending from the base to secure the trim piece therebeneath. The retaining strip further includes a flange, with at least one connector extending through the mesh panel and the flange to connect the retaining strip to the mesh panel.
